## SUMMARY

"I'm an aspiring web developer with a strong skill set acquired through a CodeHelp bootcamp. Proficient in the MERN stack (MongoDB, Express.js, React, Node.js), along with HTML, CSS, and more, I'm actively enhancing my abilities with Next.js. My objective is to secure a React-focused internship, where I can apply my MERN stack expertise to real projects while advancing my skills."

## PROJECTS

### LMS Study-Notion (Mega MERN Project) Full stack Developer

2023 - Present

<https://studynotion-a-learning-management-system-frontend.vercel.app/>

#### Description

Designed and developed a comprehensive online learning platform from scratch, combining a dynamic frontend using React and a robust backend built with the **MERN stack**. Key features include high-level **authentication**, **payment** integration, course management, and data security.

- Frontend:
  - Custom React Components: Designed and crafted a suite of custom React components for an online learning platform, ensuring a unique and user-friendly interface.
- Redux Toolkit for State Management.**
- User Authentication: Responsible for user authentication and authorization, including profile management, **payment integration**, and access control.
- Backend:
  - Robust MERN Stack Backend: Built a robust MERN stack backend, featuring MongoDB with Mongoose for data storage, Express.js for API development, and Node.js for server-side logic.
- Project Features:
  - Authentication: **JWT tokens**, email OTP password reset,
  - Role-Based Authorization: Auth, Student, Instructor, Admin Account Routes**
  - Payment Integration
  - File Management: Integrated Cloudinary
